DISPOSABLES GUIDE

BUNZL CATERING SUPPLIES DISPOSABLE RANGE

As the pace of life increases so too does the demand for 'food on the run'. To cater for this Bunzl Catering Supplies can provide you with every size and style of disposable cups, cutlery and containers. Bunzl Catering Supplies also supplies a comprehensive range of liners and plastic bags, wiping cloths, gloves, aprons, lights, candles, docket books, napkins and paper towels.

GARBAGE BAGS AND BIN LINERS

There are two types of plastic used in the manufacture of garbage bags, high density and low density. High density plastic tears easily and has a crinkly feel. Low density is stronger and resists tearing when punctured, and is often used in garbage bags, in areas where the garbage is likely to pierce the bag i.e. commercial kitchens, retail outlets etc. Recycled material can be used in the manufacture of garbage bags.

FOOD SERVICE WIPING CLOTHS

Bunzl Catering Supplies's range of wipes and cloths suit both food service and general cleaning applications and incorporate colours that allow for systematic coding often used in professional kitchens.

FOIL AND RECYCLABLE CONTAINERS

Foil and recyclable containers are multifunctional and meet the diverse demands of commercial kitchens. These containers are lightweight, can be used to freeze products, and have superior thermal efficiency - attributes which make them hard to beat for cost effectiveness and versatility. Aluminium is compatible with virtually all foods and is odour and moisture proof and are ideal for both hot and cold foods.

GLOVES AND APRONS

Gloves and aprons reduce the risk of contamination and improve work hygiene. Designed for delicate food preparations and providing optimum finger tip control and sensitivity, Bunzl Catering Supplies's range of gloves provides a choice for all establishments. Aprons also provide protection and safety. Low-cost, non-absorbent disposable aprons are another key tool in the food service industry providing two way protection to your staff and the customer.

Katermaster - Sugarcane Napkins

Predominantly sugarcane pulp (bagasse) is used to produce these paper products. Bagasse is the fibrous residue left over after the sugarcane has been crushed and the sugar extracted. The fibres have shorter lengths and are well-suited for producing tissue paper. The finished product is soft and has strong water absorbency; and more importantly: 100% biodegradable! Sugarcane bagasse products compare favourably with common "tree-made" paper.

The product is all made from the residues of an annual agricultural crop by-product, helping to reduce the commercialisation of our forests.

- Sugarcane products are soft and have strong water absorbency. No added fragrance.
- Requires less bleaching chemicals than wood pulp.
- Using agriculture crops reduces deforestation.
- Available in Dispenser, Cocktail, Luncheon & Dinner sizes.
