

KITCHENWARE

KITCHENWARE GUIDE

Bunzl Catering Supplies helps make a chef's life easier with our extensive range of Pastry Utensils, Baking, Kitchen Utensils and Cookware. The range has been sourced from both Australia and leading international brands of finest kitchenware.

CHOOSING YOUR COOKWARE MATERIAL

Aluminium

Aluminium cookware is a great conductor of heat.

Black Iron

Black iron has adequate heat absorption and conduction. Black iron cookware should always be seasoned.

Cast Iron

Cast iron is a good slow conductor.

Oven Proof China

Oven proof china absorbs and holds heat well. Extremely high firing temperature makes oven to table china very resistant to thermal and mechanical shocks. Safe for use in ovens and microwaves, but should never be exposed to naked flame or electrical elements.

Copper

Super conductor of heat. Copper interacts with all foods so vessels must be lined with tin or stainless steel.

Oven Proof Glass

Good absorption of heat. Oven and microwave safe due to the firing process.

Stainless Steel

Good conduction if bottoms include aluminium or copper.
