Tucker - Burn Protection

Our new range of Burn Protection Products from Tucker will help to protect your staff. Your staff are a valuable component of your business. With Tucker Safety Products and programs at work in your operation, your employees will feel valuable and protected. This will lead to improved performance and safety compliance

Some of the most serious kitchen injuries occur at the fryer when filtering or changing the oil. For this reason, we offer our Full Body Protection Kit. These ensembles offer effective protection against these risks, which are often severe. Avoid serious accidents before they occur, and reduce liability.

QuickKlean products wipe clean in your operation, no machine washing required. More than simply cosmetic, our aprons are equipped with VaporGuard™ liquid/vapor barrier, so they effectively protect against spills and splatters of boiling water, steam, hot oil and hot grease. Nomex® models offer the added security of flame-resistance.

Tucker Safety Products SteamGlove™ hand protection was designed and developed for the Commercial Kitchen to provide safe and sanitary protection to employees that are working around lower temperature, wet and messy applications.

- Watertight knit-lined SteamGuard™ barrier glove will offer excellent protection from a wide array of chemicals, hot water and liquids that can pose a danger.
- Rough finish texture that delivers a SureGrip™ in even the most oily and wet applications.
- Offers flexibility and dexterity not found in any other glove available.
- Interlock liner offers an added degree of comfort and liner protection.
- Made from ingredients that are in compliance with FDA's 21 CFR, parts 170 to 199, which means it is ideal for food handling and preparation.
