Making The World A Safer Place To Eat

- Fildes food safety labelling systems help your business in the prevention of food borne illness and food wastage.
- Day-of-the-Week labels are colour-coded for easy identification on incoming and prepared foods. Labelling foods correctly ensures proper food rotation is consistently achieved in your operation.
- Use First Labels, used in conjunction with Day-of-the-Week labels, are useful in ensuring food is not wasted, because they identify foods to be used first.
- Colourful and convenient, Fildes will improve your bottom line and help make your food operation safer.
