WHAT WE DO

We are a leading specialist distribution group supplying a broad range of non-food consumable products that are essential for our customers to operate their businesses.

We have partnered with both suppliers and customers in providing outsourcing solutions and service oriented distribution.

We are active in 23 countries with more than 13,000 employees working from over 240 distribution centres. Our main customer markets include contract cleaning, food processors, healthcare, hotel & catering, industrial, redistribution, retail and safety.

We provide our customers with value-added integrated supply services, including procurement and inventory management, to enable them to focus on their core businesses and increase their efficiency and competitiveness.

We are successful because we understand our customers' needs and deliver products when and where they need them.

OUR BUSINESS MODEL

Our business model offers significant benefits to both customers and suppliers. We source our products internationally, working with top international brands as well as local suppliers, to ensure that our customers have access to the best and most suitable products to meet their needs.

By outsourcing the purchasing, consolidation and distribution of a broad range of non-food consumable products, our customers are able to focus on their core businesses as well as achieving significant purchasing efficiencies, freeing up working capital and simplifying their internal administration.

DELIVERING ON OUR RESPONSIBILITY TO REDUCE OUR ENVIRONMENTAL IMPACT

Through a diverse range of initiatives from improving our paper and plastic recycling to fitting energy saving lights in our warehouses and reducing our fuel consumption, we are committed to reducing the environmental impact of our operations. We are also continually developing further ideas on green products as well as providing staff education and customer information.

BE GREEN

At Bunzl we see our commitment to reducing our impact on the environment as a key area of our corporate social responsibility. From increasing recycling programmes to reducing fuel usage to sourcing green products: we're constantly looking for new ways to improve our performance.

Our environmental strategy is three pronged. First, we measure key areas of impact. Second, we set standards to reduce our global footprint. Third, we communicate what we've learned to our employees and our customers. Working together we can build a more sustainable future.

OPERATING TO REDUCE OUR ENVIRONMENTAL IMPACT

Bunzl PLC is included in the FTSE4Good Index and Bunzl also gained national accreditation to ISO14001. This is the most well-known environmental operating standard and is certified by an external certification authority. Gaining accreditation means that Bunzl has implemented and maintained an environmental management system, which provides for continuous improvement in environmental performance.

Our key areas of focus are:

- Increasing waste for recycling and reducing waste to landfill;
- Reduction of fuel used for transportation;
- Environmentally friendly service offering; and
- Environmentally friendly products.

ENVIRONMENTALLY FRIENDLY SERVICE OFFERING

A fundamental part of Bunzl's offering to customers is our expertise and in depth product knowledge, coupled with the ability to consolidate the procurement and delivery of a broad range of non-food consumable products. This service can cut the environmental impact as it can reduce the number of deliveries within a company's total supply chain, as well as decrease the amount of invoices and payments. Bunzl's core service offering can help customers to reduce fuel emissions, paper usage and other energy requirements. Further, a consolidated invoice allows better monitoring of the use of consumables and therefore can reduce duplication and waste.

ENVIRONMENTALLY FRIENDLY PRODUCTS

Bunzl recognises that companies want to be able to participate in positive initiatives around sustainability and the environment. We see our role as providing our customers with environmental product solutions to help them make informed choices without bias towards any specific solution. This might be through the provision of product manufactured from renewable, recycled and/or biodegradable materials.

The Nordic and European eco-label
The purpose of eco-labelling is a reduction of the impact of a product on the environment and health.
The criteria are based on an estimation of the entire lifecycle of a product, from the raw materials to the production and from the use to the disposal.

THERE'S NEVER BEEN A BETTER TIME TO GET CONNECTED

Bunzl offers you a quick, easy and efficient solution for your on-line ordering needs.

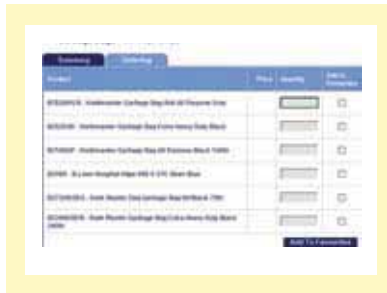

- Place orders when it suits you 24 hours a day 7 days a week
- Select from our extensive online product offering
- Access information on product availability, pricing, invoices and order status
- Controlled access for ordering and customised product selection
- View, email or print invoices
